

MOTOR INFORMATION SYSTEMS

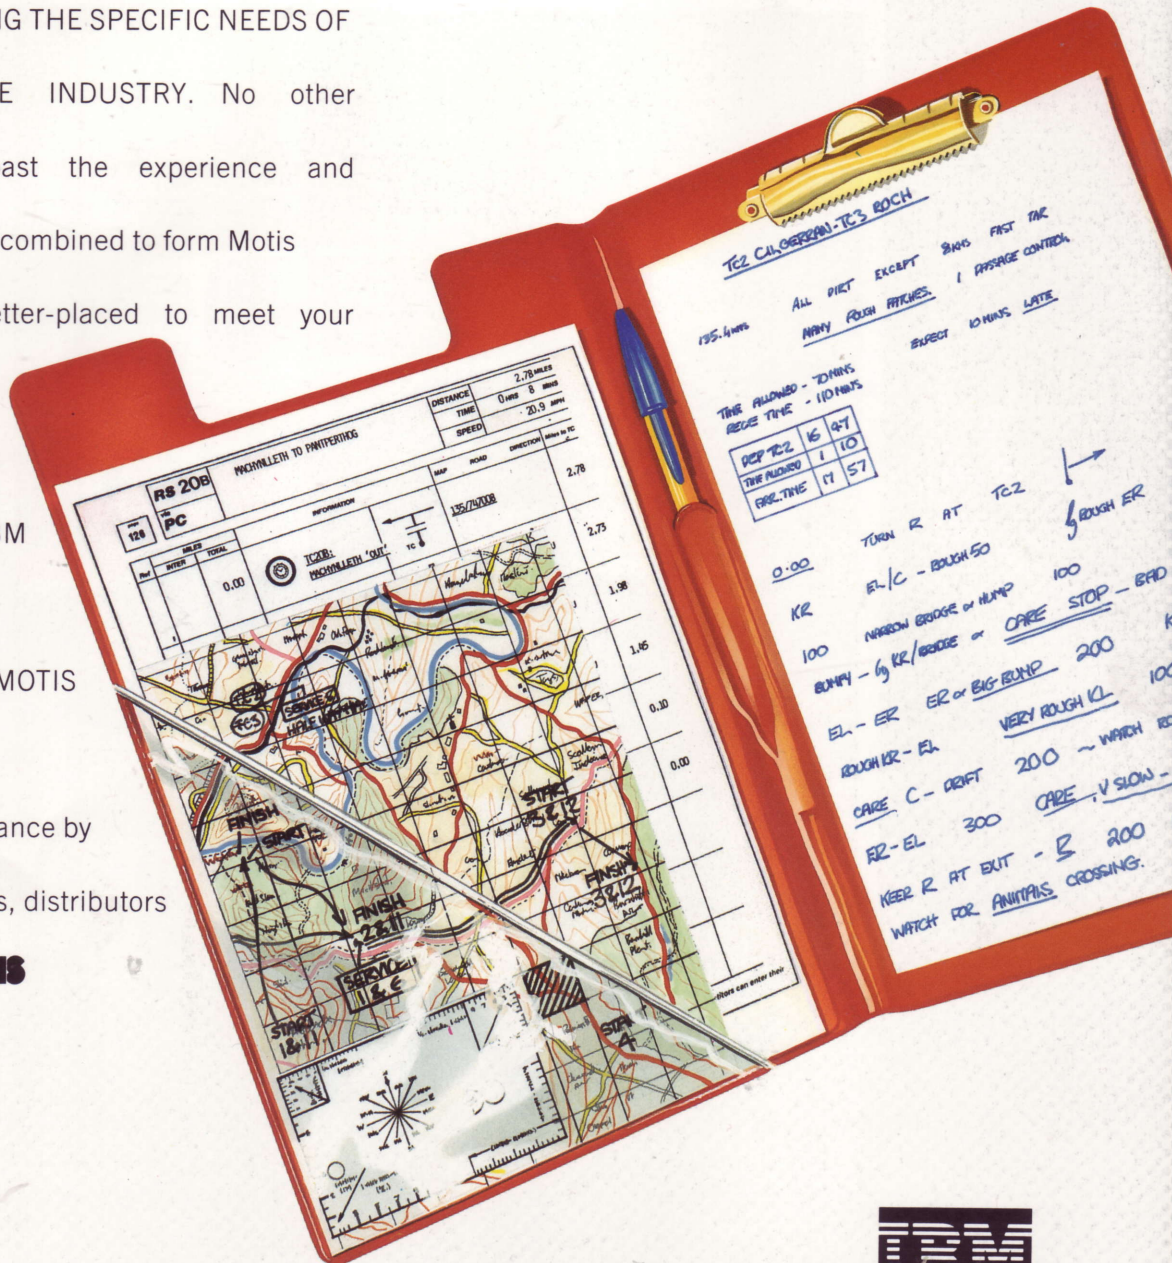

# ■ CHARTING THE ROUTE

MOTIS software is recognised as setting new standards for motor industry systems.

Our success is attributable to one clear philosophy: MEETING THE SPECIFIC NEEDS OF THE AUTOMOTIVE INDUSTRY. No other company can boast the experience and resources that have combined to form Motis Systems or is better-placed to meet your computing needs.

MOTIS operates on a wide range of IBM equipment.

The pedigree of MOTIS is illustrated by its international acceptance by motor manufacturers, distributors and dealers.

# ■ SETTING THE PACE

MOTIS is a comprehensive and flexible system used by all sectors of the motor industry.

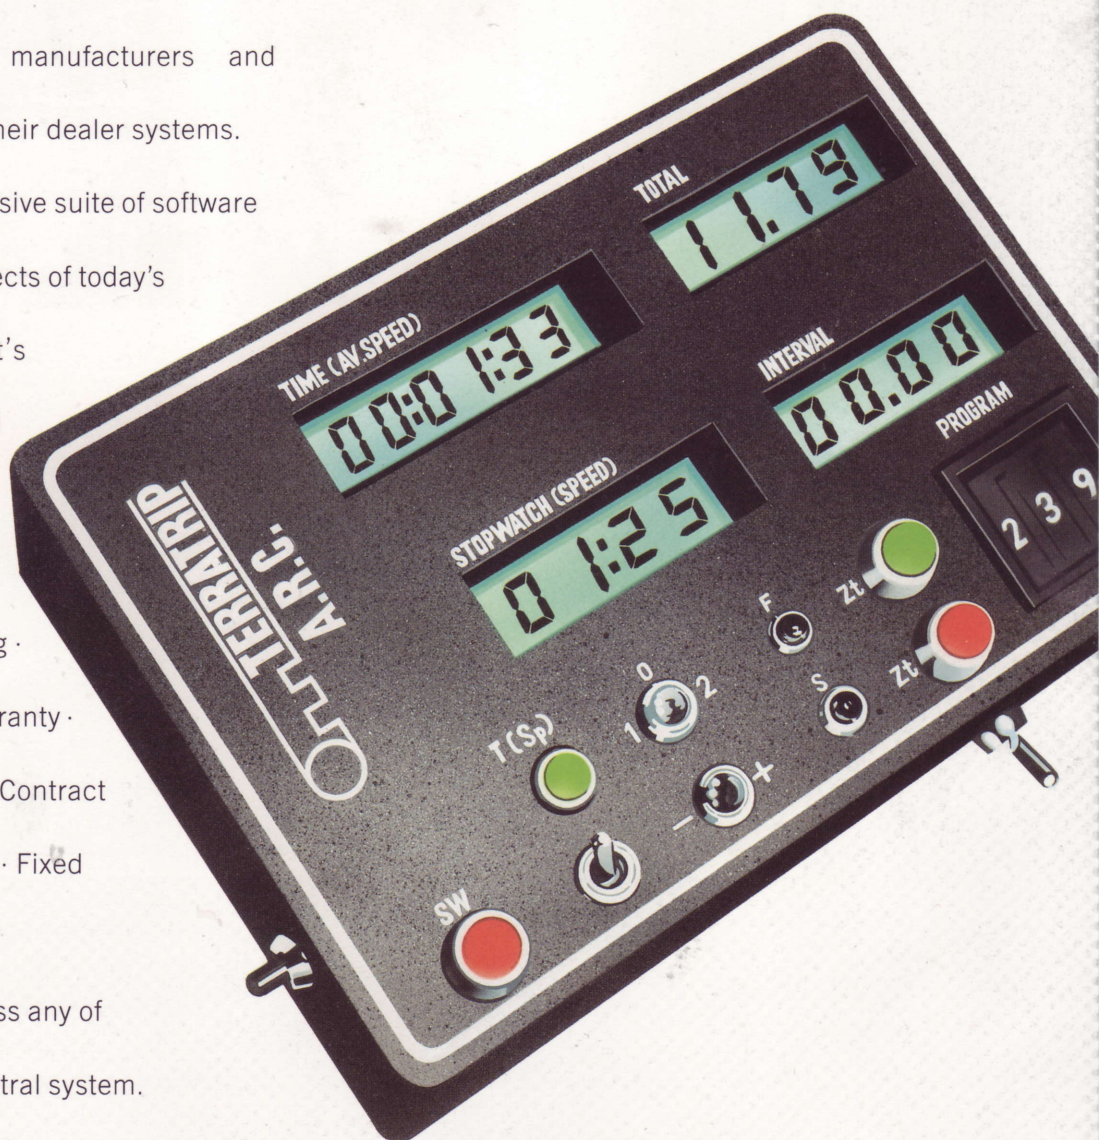

MOTIS offers the dealer an inhouse computer for accounting, parts, service, sales and warranty. Its ease of use and powerful communications allow manufacturers and importers to standardise their dealer systems.

MOTIS is a comprehensive suite of software packages covering all aspects of today's motor industry business. It's a system your company will grow into, never out of.

Parts Management ·  
Marketing and Prospecting ·  
Service Management · Warranty ·  
Vehicle Sales · Rental and Contract  
Hire · Accounting · Payroll · Fixed  
Assets · Forecourt ·

Remote sites can access any of these packages on the central system.

MOTIS isolates functions yet integrates operations. It provides a full range of benefits to support the forward-thinking business. **MOTIS**

# ■ TEAM SUPPORT

Our commitment goes far beyond installing the system.

The MOTIS Customer Support Centre at Oxford has operating, educational and demonstration facilities to give total customer backup.

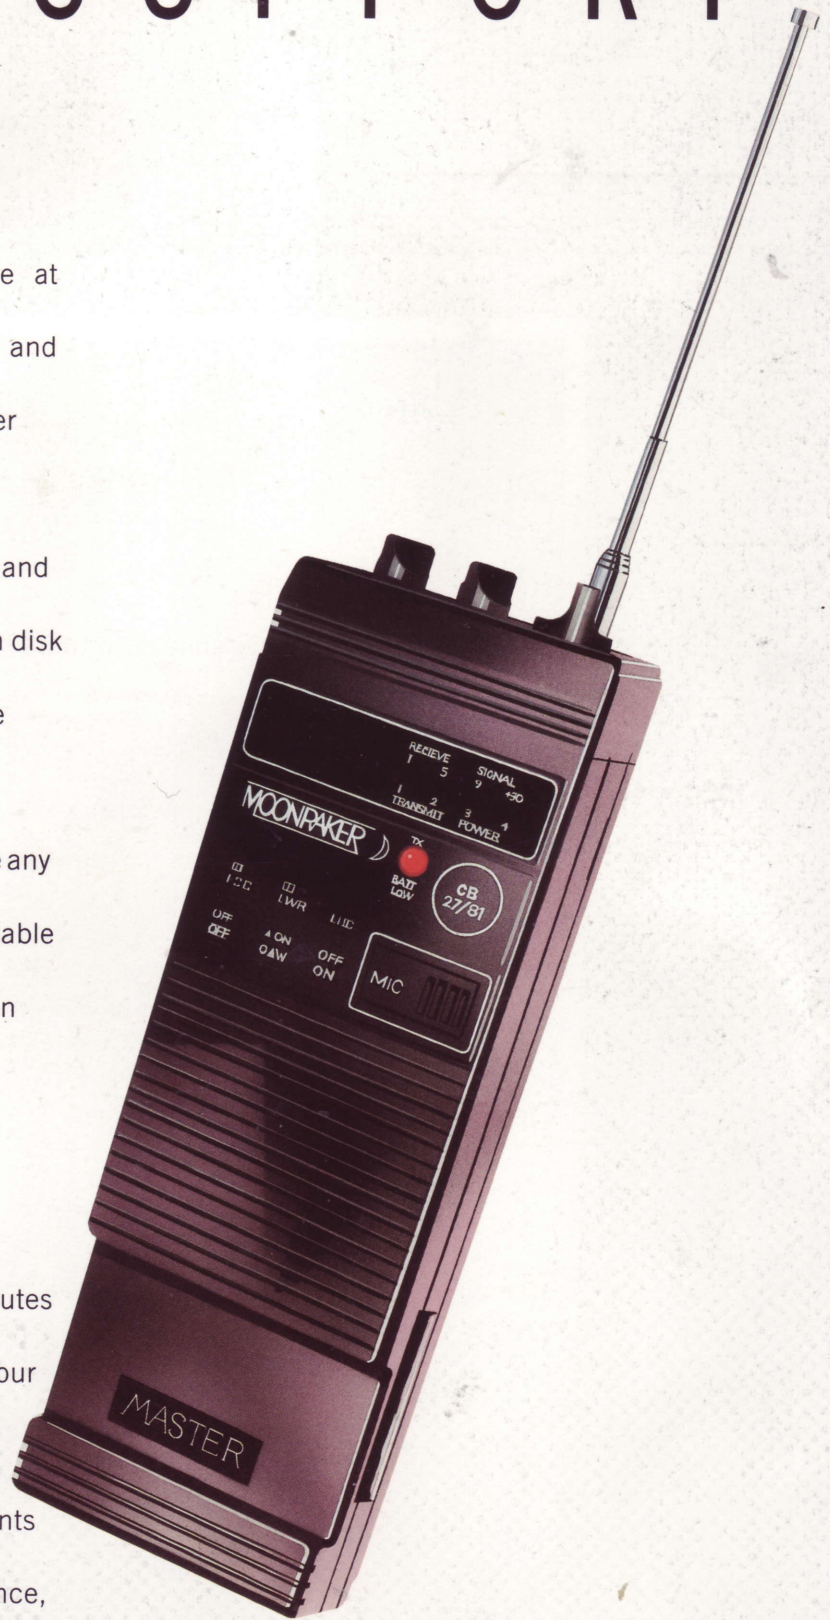

Manuals are provided for both hardware and software. The software manuals are held on disk and updated automatically for each software release.

A full hotline service is provided to resolve any queries quickly and easily. This is available worldwide and permits telephone connection by remote terminal to user systems for diagnostic purposes.

The Centre provides data conversion master files and price tapes, and distributes software enhancements made as a result of our ongoing development for clients worldwide.

A team of industry-experienced consultants provide central or on-site training and guidance, with a full range of central training courses available.

available. 

# LEADING THE FIELD

Since its introduction, MOTIS has consistently led its competitors in technology and innovation. It has become the system against which others are judged, and is written using the latest IBM language (RPG3).

Rolls-Royce use MOTIS software at their London and Lausanne (Switzerland) sites for accounts, service and international motor parts distribution.

JCB dealers in the UK and Europe make extensive use of MOTIS systems to cover all aspects of their activities. This network uses communications to the manufacturer for ordering, enquiries, warranty, etc.

Heap & Partners are the world's largest distributor of Saunders valves. MOTIS software links three sites handling a product range of some 2.5 million combinations of types and sizes. High service levels yet optimum stock depths are maintained using the stock forecasting and recording techniques held in MOTIS.

Audi VW selected MOTIS as their choice to support the aftersales business of their 400 UK

dealers. Each dealer benefits from the powerful support offered by menu pricing (fixed price guarantee), parts stock control and fully online workshops with service history and communications. Audi-VW have purchased block licenses for MOTIS and market and support the product directly for their network as "System Aftersales".

Cummins Engine Corporation use MOTIS worldwide. MOTIS parts management, scheduling and pricing techniques sustain the Cummins reputation for cost, quality and reliability.

Auto Safety Centres use MOTIS for their network of 60 depots. 30,000 jobs are held online for their "fast fit" service operations. Daily operating statistics are communicated overnight to their head office.

ERF trucks carry out their distribution requirements using MOTIS for communication between their headquarters and dealer network.

With MOTIS you are investing in a proven solution. 

# THE WINNER

MOTIS is a proven product which can provide:

Increased Productivity · Reduced stock levels ·

Improved Customer Services · Up-to-Date

Management Information · Increased

Profitability · Increased Control ·

Any system is only as successful

as the company that provides it and the personnel

that support it.

The benefits of MOTIS SYSTEMS are:

Financial Security · Industry Specialists ·

Innovative Development Staff ·

Customer Support Service ·

THE PROVEN SOLUTION.
